- Isofix Base

Product Images

Product Description

One safe base for two high-quality car seats.

On the Select Base can be installed both the Select Baby car seat and the Select Kids rear-facing car seat. The i-Size base can be used in vehicles with ISOFIX connection and in those with i-Size seats.

The installation of the base is easy and fast. To begin, the base's ISOFIX connectors are connected to the attachments in the vehicle. To finish, the support leg is unlocked with one hand, making it reach the floor of the car where it automatically clicks in. This offers optimum stability.

Thanks to the guide rails, both car seats are very easy to click on the base. To remove the seats from the base, simply press the button located on the front of the base.

The coloured indicators on the base and on the support leg show whether the base and the seat have been correctly installed with green. Has the seat been installed incorrectly, the indicators show red.
